Geham State School Prep Term Overview Term 4, 2026

ENGLISH	In this unit, students read, view and comprehend an imaginative, decodable text. They will also create a short, written text to retell a familiar story.
MATHS	In this unit, students continue to develop their proficiency and positive attitudes towards mathematics and its applications. They look for and make connections between number names, numerals and quantities, and compare quantities to at least 20 using mathematical reasoning in active learning experiences. They explore situations, sparked by curiosity, using physical and virtual materials to represent, partition and solve everyday problems. They build confidence and autonomy in being able to make and justify mathematical decisions based on quantification. They learn to recognise repetition in pattern sequences and apply this to creatively build repeating patterns in a range of contexts.
SCIENCE	Students learn that observations can be organised to make patterns and that these patterns can be used to make predictions about phenomena. They develop curiosity about the physical world by observing and showing how everyday objects such as toys, tools and animals move, and they explore factors that influence movement, such as size, shape and material. Students share their ideas about ways different and unusually shaped objects move and compare observations with their predictions to understand the physical world. They explore how the size and shape of traditional toys influence their movement. Based on their experiences of motion, students seek answers to questions they pose, using their senses to gather different types of information. With guidance, they use digital tools for measuring and comparing the movement of objects of different shapes and sizes and look for patterns, such as the relationship between wheels and the ways toys move. They examine different ways of sharing questions, making predictions and describing observations with others.
HEALTH	**Looking out for others** In this unit, students identify and describe different emotions people experience. They explore and practise ways to interact with others in a variety of settings. They will also be completing lessons on water safety in the pool, at the beach and on the farm/backyard locations leading up to swimming lessons.
TECHNOLOGY	**Collection of work – computers: handy helpers** In this unit the students will be identifying digital systems and will be exploring reasons for using different devices.
PE	Students will participate in learn to swim lessons.
THE ARTS	**Musical stories** In this unit, students make and respond to music by exploring the ways that music can evoke stories, including soundscapes and sound stories, program music and lyric stories.
HOMEWORK	Homework will include home readers and sight words.

EVENTS	
16th October	Fire Truck Visit
29th October	Book Fair commences
30th October	Grandparents Day 10:30 & Arts Extravaganza 11:30
11th November	Remembrance Day
12th November	Swimming Commences
30th November	2027 School Captain Speeches and Voting
4th December	Twi-light Family Fun Night
10th December	Year 6 Graduation
