

ENGLISH	Expressing Opinions Students engage with a range of imaginative and informative texts which contain storylines, learnt topics or topics of interest. These texts provide a stimulus for using language to express opinions and understanding of how topics can be presented in persuasive texts. Students will create a spoken text to express a preference for a place or setting to peers.	
MATHS	Number, Space, Measurement Students will: • identify and represent part-whole relationships of fractions in measurement contexts such as measures of turn and representations of time • build a sense of understanding of fractions by partitioning collections, shapes and objects into equal parts (halves, quarters and eighths) • compare and classify shapes, describing features using formal spatial terms • use uniform units to measure, compare and discuss the attributes of shapes and objects based on length, capacity and mass • use and expand on understanding of number sentences to formulate additive situations and represent multiplicative situations using equal groups and arrays • use mathematical modelling to solve practical problems involving authentic situations by representing problems with physical and virtual materials and diagrams, and using different calculation strategies to find solutions • recognise that mathematics can be used to investigate curious things, to solve practical problems, model everyday situations, and describe thinking and reasoning using familiar mathematical language.	
SCIENCE	Sound In this unit, students will learn all about sound and how it is produced. They will also explore the effects of sound energy on a variety of objects through hands-on experiments and by recording their observations.	
HASS	Present connections to places In this unit students will explore how people are connected to their place and other places in the world. They will learn about places that are defined at different levels or scales, such as, personal scale, local scale, regional scale, national scale or region-of-the-world scale. Students will also understand the purposes of why people are connected to various places.	
TECHNOLOGY	Computers: Handy helpers In this unit students will learn and apply Digital Technologies knowledge and skills through guided play and tasks integrated into other subject areas. They will recognise and explore how digital and information systems are used for purposes in daily life.	
HPE	Health: My classroom is healthy, safe and fun In this unit, students investigate the concept of what health is and the foods and activities that make them healthy. They explore opportunities in the classroom environment where healthy and safe practices can be implemented. Students identify the actions that they can apply to keep themselves and others healthy and safe in their classroom. PE: Modified gymnastics iMove, iJump, iLand In this unit, students will demonstrate fundamental movement skills of rolling, balancing and jumping. They will perform gymnastic skills as a continuous movement sequence that incorporates the elements of movement: body awareness, effort (flow) and space awareness.	
THE ARTS	Music: Save the world In this unit students explore a range of songs rhymes and chants based on the theme of Earth's resources and how they can be used and managed. They will also be learning songs by "The Two-Wheel Time Machine" to prepare them for the concert at the end of Term 3. Visual Arts The children will be exploring the elements and principles of art using different media. They will develop skills and create artworks that demonstrate techniques learnt in class.	
HOMEWORK	Homework will be sent home on Monday and returned on Thursday each week. Homework tasks will be aligned with the key learning areas of maths and literacy and are designed to consolidate concepts learnt each week. Please remember to send your child's homework folder back to school every Thursday. This allows homework to be marked and the next week's homework sheet to be glued in, ready to be sent home.
